- Team collaboration mindset

CAREER OBJECTIVE

Aspiring Full Stack Developer (Fresher) with 3 years of hands-on experience in Web Designing. I have built a strong foundation in front-end technologies like HTML, CSS, JavaScript, and Shopify frontend design, and recently upskilled myself in backend development using Node.js, Express.js, and MongoDB. My design background gives me a unique advantage in building both functional and visually appealing full-stack applications. I am looking for an opportunity where I can contribute to real-world development projects, continuously learn, and grow as a professional developer in a dynamic and tech-driven environment.

TECHNICAL SKILLS

Frontend : HTML5, CSS3, JavaScript, React.js, Bootstrap, Tailwind CSS, shopify frontend Design

Backend : Node.js, Express.js, REST APIs, API Integration Authentication (JWT/Bcrypt)

Database : MongoDB

Design Tools : Figma, Adobe XD

Others : REST APIs, JSON, Responsive Web Design

WORK EXPERIENCE

Company Name :- CIRKLE STUDIO
Web Designer - 3 year

I worked as a Web Designer at Circle Studio, where I designed and developed responsive, user-friendly websites. My role involved creating layouts compatible across devices, optimizing for performance and SEO, and collaborating with clients and developers to meet project goals. I contributed to multiple web projects that enhanced clients' online presence and user engagement.

PROJECTS

E-Commerce Website

Built a full-stack E-Commerce app using the MERN stack, featuring JWT-based auth, admin/user roles, and RESTful APIs. Implemented product listing, search, filters, cart, and checkout with Developed an admin dashboard for managing products, orders, and users. Used Redux Toolkit for state management and Tailwind CSS for responsive UI. Deployed on Vercel, Render, and MongoDB Atlas, focusing on performance, clean UX, and scalable code architecture.

Task-Flow -Task Management

Developed TaskFlow, a full-stack task management app using the MERN stack with JWT authentication and role-based access. Features include task/project CRUD, priority levels, due dates, and status tracking. Used Redux Toolkit, Axios, and Tailwind CSS for responsive UI and state management. Followed MVC pattern with REST APIs and deployed via Vercel, Render, and MongoDB Atlas. Focused on clean UX, reusability, and task filtering.

MailMindr

Built MailMindr, an automated email reminder app using the MERN stack, with JWT auth, Node-Cron for scheduling, and Nodemailer for sending dynamic emails. Designed a responsive UI with React.js + Tailwind CSS and managed reminders via MongoDB linked to user accounts. Backend follows MVC structure with RESTful APIs. Deployed on Vercel, Render, and MongoDB Atlas, focusing on clean UX and reliable scheduling.
